• B2P Blog
• B2P Org Message
• eNews
Release Highlights

On Monday, November 7, you will notice some changes in Buy-to-Pay due to the 22.3 Release.

B2P Previews / Updates:

• eProcurement - Minor UI changes
• Contracts – UI changes on the contract record
• Reminder - New UI / Classic toggle on forms to be removed
eProcurement: Minor UI changes

1. The action items menu on all documents (PO, invoice, change request, etc.) has moved from left arrow drop-down to the right side of the screen accessed via the ellipsis.

2. Supplier Name will appear in the header on POs and Invoices.
Contracts: UI changes on the contract record

New UI Experience

1 – A new Check In and Check Out message has been added to the top of the page.

2 – The Add Party dropdown from the current experience (pictured below) will be replaced with two buttons: Add First Party, Add Second Party.

3 – The Contract Party Actions dropdown menu from the current experience (pictured below) will be replaced with a pencil icon for Edit and a trashcan icon for Remove.

4 – A new message has been added to communicate when a First or Second Contract Party is needed.

No functionality was added or removed as a result of these additions and changes.
In 22.2, a new UI forms experience was introduced with a temporary toggle to the “Classic” form. This is a reminder that the toggle is planned to be removed on or around Nov. 7.
FYI – The distribution method is not formatted properly.

Does not affect functionality. A support ticket is logged with Jaggaer already.
Thank you!

• Next release (23.1) is March 2023.
